this condition may present a wide variety of clinical manifestations, most of which are treatable.

treating with ivomec should be done even in heart worm positive dogs as it stops the heart worms from reproducing.

my original course was a long one with heavy dosage and i gained a lot of weight, grew facial hair, became 'moon faced' and had pretty rough mood swings.

this is a popular option in several parts of the world for folks who want to have two numbers in a single phone.
